

Q-Write a query in SQL to list the first and last names of all the actors who were cast in the movie 'Boogie Nights', and the roles they played in that production.

ANS:->

```
select act_fname, act_lname from actor join movie_cast on  
actor.act_id=movie_cast.act_id join movie on  
movie.mov_id=movie_cast.mov_id where movie.mov_title='Boogie Nights';
```

The screenshot displays the Oracle APEX SQL Workshop interface. The top navigation bar includes 'APEX', 'App Builder', 'SQL Workshop', 'Team Development', and 'Gallery'. The user 'Raghav Malhotra' is logged in. The 'SQL Commands' tab is active, showing a query that has been executed. The query is as follows:

```
1 select act_fname, act_lname from actor join  
2 movie_cast on actor.act_id=movie_cast.act_id join  
3 movie on movie.mov_id=movie_cast.mov_id  
4 where movie.mov_title='Boogie Nights';  
5  
6
```

Below the query editor, the 'Results' tab is selected, showing a single row of data:

ACT_FNAME	ACT_LNAME
mark	wahlberg

Below the table, it states '1 rows returned in 0.00 seconds'. The bottom of the screen shows the Windows taskbar with the date '20-12-2021' and time '02:48'.
